Subject: RE: South Dayton Dump and Landfill Site - OU2 Screening Levels, request for documents
38443-14 Screening Level Tables_061913.xlsx

Hello Maddie –

CH2M HILL received screening level tables last week. We then requested that CRA resend them to include the correct table header information, which is attached. Also, I pasted below the CRA email text that came with the tables:

Please find attached a revised file of screening level tables. The tabs have been reordered to match the DQO tables, and titled with the applicable media. Screening Level Table 4.1 'Soil' applies to two of the DQO tables: Table 3.1 – Southern Parcels Fill Investigation, and Table 3.6 – Floodplain soil Investigation.

In accordance with the May 23rd conference call, the screening level tables were prepared to include all screening values for all media. Human Health and Ecological screening level criteria were included in these tables. These screening level criteria may not necessarily be included in the 38443-Report 19 OU2 RI Scoping Document DQO tables.

CH2M HILL will begin review of the OU2 DQO's, in conjunction with these screening levels, as soon as the conceptual site model is delivered. We will forward the CSM material to USEPA and Ohio EPA as soon as we receive it.

Thank you.

Subject: South Dayton Dump and Landfill Site - OU2 Screening Levels, request for documents

Kevin,

Brett mentioned last week that the screen levels for sampling taken on OU2 at the South Dayton Dump and Landfill Site had been submitted. I didn't not receive them, could you forward me the information?

Thank you,

Maddie
